BLUEBIRD

Blueprint | A Comprehensive Physical Security Assessment

Overview

Blueprint is a high-impact, enterprise-grade physical security assessment built to help organizations evaluate, optimize, and future-proof their security infrastructure. It combines on-site analysis, system evaluation, and stakeholder input into a clear, actionable report that supports smarter decision-making.

What's Included

Site Walk Documentation

Detailed walkthroughs of selected sites with annotated floorplans, system locations, and noted vulnerabilities or blind spots.

Infrastructure Review

Evaluation of existing physical security systems, including cameras, access control, alarms, and environmental sensors. We assess condition, placement, and system performance.

Networking Equipment Audit

Documentation of network racks, switches, and other low-voltage hardware. Includes lifecycle recommendations and upgrade priorities.

Stakeholder Interviews

Input from key team members to capture on-the-ground challenges, process gaps, and strategic goals for each site.

Vendor & Pricing Analysis

Review of current vendor contracts and pricing. We benchmark against our national data and identify areas for cost savings or improved service.

Executive Summary & Roadmap

A polished, client-ready report that summarizes findings, prioritizes opportunities, and outlines a clear path for improvement or transition.

Why It Matters

- Brings visibility to fragmented or outdated systems.
- Neutral, expert opinion for vendor or upgrade decisions.
- Supports internal alignment across operations, IT, and procurement.
- Provides documentation you can use for budgeting and leadership buy-in.
- Positions your org to proactively address safety, ensure compliance, and implement industry-leading security solutions.

What We'll Deliver

- A clear, executive-ready report designed for internal planning and leadership alignment.
- Supporting visuals (rack photos, annotated maps, network snapshots).
- Security roadmap: 30/60/90-day quick wins + long-term recommendations.
- Optional cost comparison sheet and manufacturer-aligned pricing.

Scalable by Design

While Blueprint is built as a comprehensive, enterprise-grade assessment, we also offer a streamlined "Blueprint Lite" version. It's ideal for smaller organizations or teams looking for a faster, more focused evaluation. Same methodology. Scaled to fit.
